DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2616.

"Response"

In view of the amendment thereby amending the claims thereby causing the claims to be further divergent subject matter {than originally presented}, the examiner requires a restriction based on the claimed divergent subject matter.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 27, 19-23, 29, drawn to, editing by "receiving data content and removing background content from the data content", best classified and searched in class 345, subclass 731 etc....
- II. Claims 7-8, 13-16, 31, 17-18, 30 and 25-26, drawn to claims directed toward uploading or retrieved system data, such as periodically, issues such as purchasing or other, system related types of data, best searched and classified in class 709, subclass 219.
- III. Claims 9-12 and 28, drawn to claims directed toward concepts of wherein media (low bandwidth) is prepared by a remote server by removing content (high bandwidth), further wherein the server can update the

Art Unit: 2616

content), best classified and searched in class 725,
subclass 116.

The inventions are distinct, each from the other because of
the following reasons:

2. Inventions I, II and III, are related as subcombinations
disclosed as usable together in a single combination. The
subcombinations are distinct from each other if they are shown
to be separately usable.

In the instant case, invention I has separate utility such
as, "modifying data content locally", and deemed to not require
the particulars of any other the other groups {II and III}. See
MPEP § 806.05(d).

In the instant case, invention II has separate utility such
as "uploading or retrieving system data", and deemed to not
require the particulars of any of the other groups {I and III}.
See MPEP § 806.05(d).

In the instant case, invention III has separate utility
such as "media (low bandwidth) is prepared by a remote server by
removing content (high bandwidth), further wherein the server
can update the content", and deemed to not require the
particulars of any of the other groups {I and II}. See MPEP §
806.05(d).

Art Unit: 2616

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
